

Solution Brief

HPE GreenLake

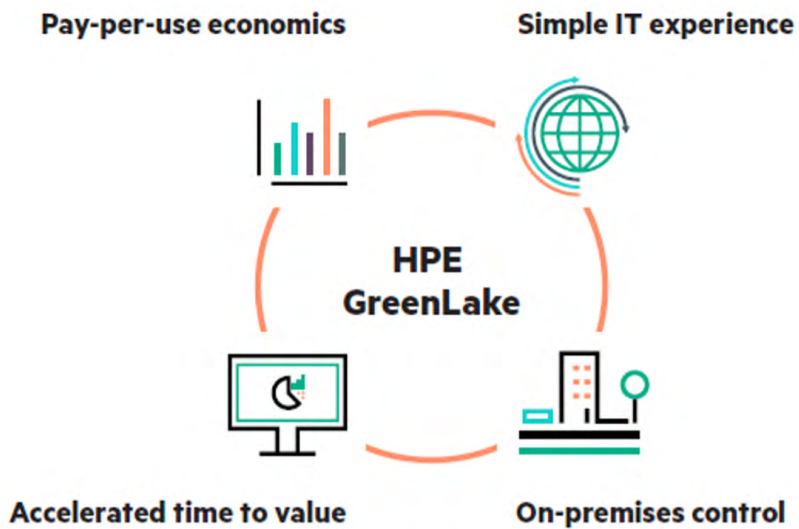

Overview

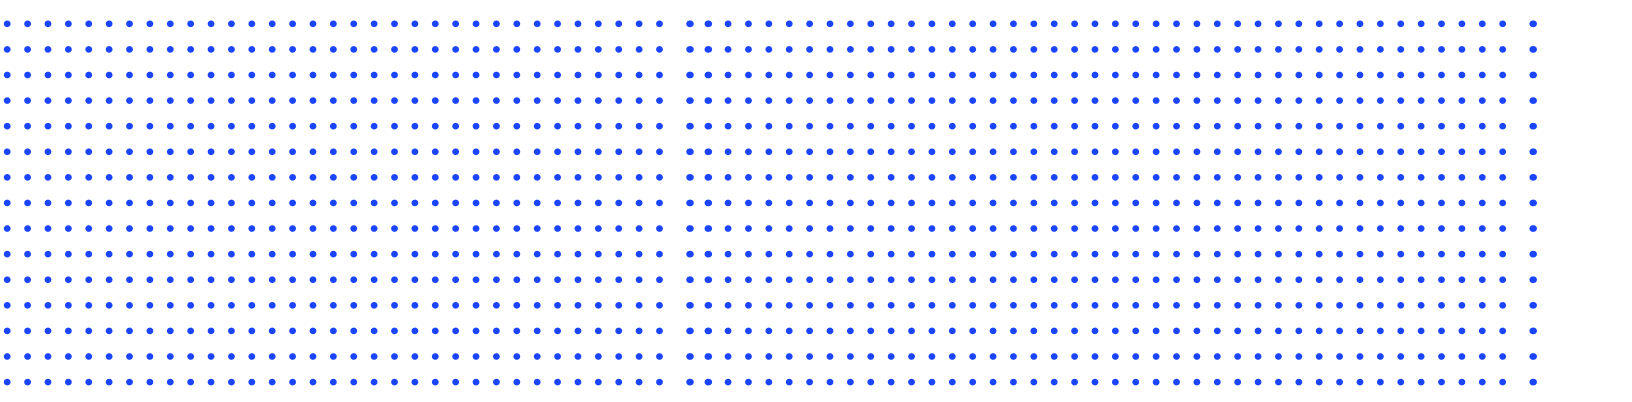

Nearly every enterprise is now in the process of moving to—or expanding their use of—cloud to speed the delivery of services, gain competitive advantage, and reduce operational costs. But without a doubt, cloud implementation has become complex and difficult for businesses to handle with only their internal IT resources. Many organizations realize that without the right expertise and cloud-native automation, they may expose themselves to undo risk and cost.

Award-winning Logicalis services leverage the simplicity of the Hewlett Packard Enterprise (HPE) GreenLake Central edge-to-cloud platform to deliver a managed cloud service environment. This helps your company simplify operations, reduce risk, eliminate complexity, and accelerate cloud adoption—without high costs, a steep learning curve and risks.

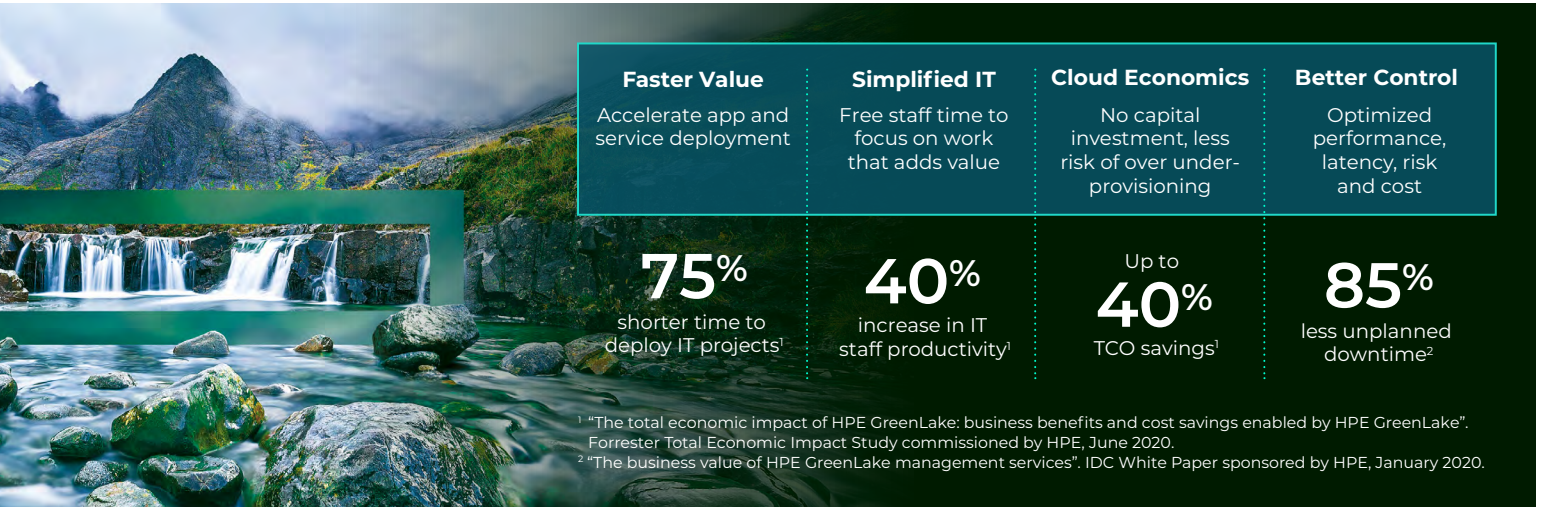

HPE GreenLake Central is a unified software platform that supports multiple user types by automating operations across all the HPE GreenLake cloud services, providing the cloud experience wherever applications and data live – at the edge, in co-location facilities, and in data centers.

With roughly 70% of applications and data still residing on-premises, Logicalis Architects of Change™ can provide the agility and financial flexibility you need to move faster by leveraging HPE's cloud-like deployment, scalability, and economics together with on-premises security and control.

Simplify Cloud Operations

Logicalis services leverage all the latest innovations built into HPE GreenLake Central, allowing your company to consume, manage, and control all your cloud services from a single client platform. This frees up your IT staff to focus on strategic business initiatives and innovation, including faster development of applications and services, and attracting more customers to help grow revenue streams.

Consumption-based services provide a wide portfolio of on-premises customer-ready solutions. Adding new cloud services is as simple as point and click in HPE GreenLake Central. Run applications and services simultaneously in just minutes—no more waiting for new configurations.

Designed for a hybrid environment, HPE GreenLake Central makes it easy for CIOs and line of business owners to access costs, usage trends, and future capacity planning capabilities. Integrated continuous compliance service improves visibility across more than 1,500 controls so compliance officers can better protect their business.

HPE GreenLake Lighthouse

Through HPE solutions by Logicalis, our experts collaborate with HPE to help you navigate a path from edge-to-cloud with HPE GreenLake Lighthouse. This newly released offering from HPE provides innovative infrastructure and accelerates the edge-to-cloud experience by bringing together cloud-native technologies and HPE infrastructure to remove configuration complexity and rapidly deliver multiple cloud services on-demand—everywhere.

Cloud-native and intelligent, HPE GreenLake Lighthouse is built with HPE Ezmeral software to autonomously optimize different cloud services and workloads by composing resources to deliver the best performance, lowest cost, or a balance of both depending on business priorities.

We knew that we could trust Logicalis to pinpoint a solution to meet our needs...Now, we have centralized storage in a stable, fast, and easy-to-use platform, as well as a clear, sustainable path for growth. It's a prime example of how Logicalis continuously leverages their network and partnerships to enable us to better focus less on our technology and more on what matters most: our students.

—Dr. Jon Eberle, CIO

Why Logicalis + HPE GreenLake

Logicalis, leverages the capabilities of HPE GreenLake Central and the latest innovations from HPE, to help our customers get to market up to 75% faster with capabilities including everything-as-a-service, built to order infrastructure with point and click service deployment, and consumption-based pricing. What's more, we can manage it all to free up valuable IT resources for higher priority business requirements.

Longtime HPE Expertise

Logicalis has been an HPE partner since 1993. We offer the full HPE solution and services portfolio and work closely with HPE to deliver the right solution for you. Our highly certified team of HPE technology experts and professionals understand the latest trends and provide you with an extraordinary customer experience. We offer a full complement of HPE solutions and services, as well as many HPE specializations and competencies. We leverage your existing assets to help design and implement a solution that meets your needs and budget.

Architects of Change™

We embrace change, help you adapt to change, and lead the change. At Logicalis we are Architects of Change. We work closely with HPE to deliver the perfect solution that meets your precise needs. We don't provide cookie cutter solutions and then wish our valued customers "good luck". We stop. We listen. And ask questions. When you partner with Logicalis you will gain immediate access to our team of account executives, solution architects, sales support representatives, project managers and customer success managers.

Global Capabilities

Logicalis is HPE-authorized in 15 countries, and we rely on a common services platform across our international operations to help your customers grow globally.

Embrace Change, Driven to Succeed

Our goal is to make sure you succeed—your success is our success.
