

A security-first, AI-powered networking journey with HPE Aruba Networking

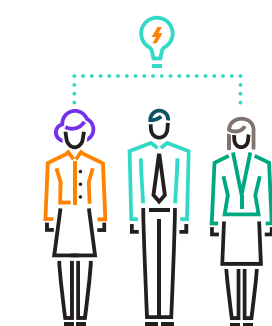

In nearly 20 years of HPE Aruba Networking innovation, security will not be an afterthought, and we continue to build upon our rich heritage of innovative networking embedded with security.

Secure Wi-Fi transformation

HPE Aruba Networking embark on its journey to secure enterprise Wi-Fi as consumer Wi-Fi is transformed.
[What is Wi-Fi 7?](#)

2007

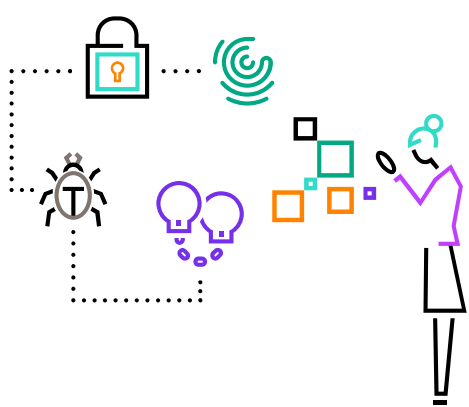

Embedded firewalls in many controllers

For the first time, HPE Aruba Networking secures its controller portfolio with embedded firewalls in all devices.
[Explore HPE Aruba Networking controllers](#)

Mobile BYOD now secured

The acquisition of the lead developer of network security solutions, AVENDA, enhances HPE Aruba Networking's MOVE architecture with policy-driven BYOD capabilities.
[Explore HPE Aruba Networking ClearPass Onboard](#)

2011

A security star is born

HPE Aruba Networking launches ClearPass, now the industry's leading network access control (NAC) solution.
[Explore HPE Aruba Networking network access control](#)

Business intent overlays introduced

Customers can control and secure traffic by delivering applications to users according to business need, extending microsegmentation from the data center across the WAN and easing adherence to compliance mandates.

2016

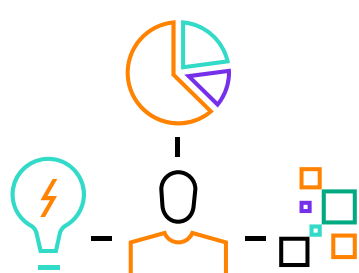

Security leadership for the intelligent edge to edge

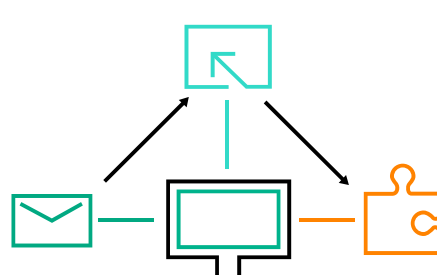

HPE Aruba Networking acquires Niara and introduces new behavioral analytics capabilities to better protect data and high-value assets.
[Explore AI-powered visibility and profiling with Client Insights](#)

Dynamic Segmentation

The introduction of secure Dynamic Segmentation features tie network access control to automatic policy enforcement.
[Explore HPE Aruba Networking Dynamic Segmentation](#)

2018

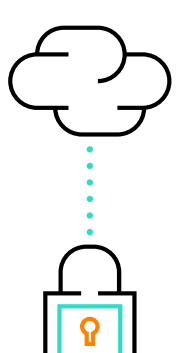

Secure SD-Branch

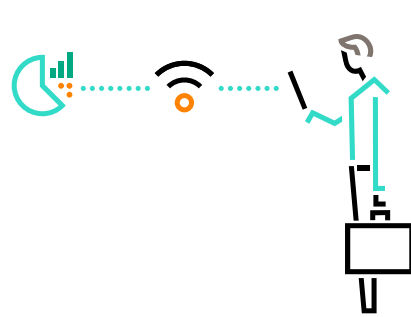

Context-based policy enforcement for SD-Branch is launched, expanding EdgeConnect SD-Branch to include WAN, WLAN, wired, and security.
[Explore HPE Aruba Networking EdgeConnect SD-Branch](#)

Acquisition of SD-WAN leader

Adding Silver Peak's industry-leading SD-WAN helps deliver a comprehensive portfolio for securely connecting any edge to any cloud, forming the foundation for a unified SASE solution.
[Explore EdgeConnect SD-WAN](#)

2020

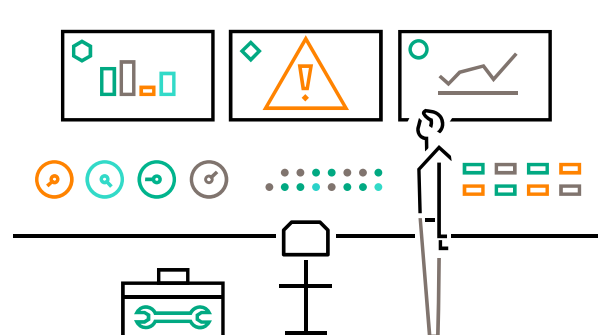

Debut of cloud-based NAC

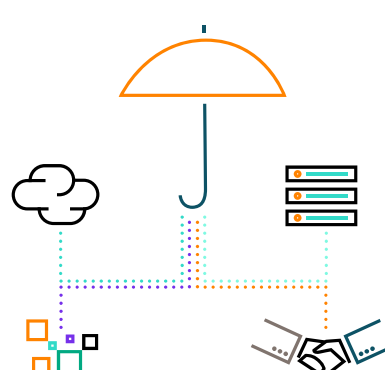

Cloud authentication and policy capabilities in HPE Aruba Networking Central allow seamless onboarding and secure role-based policies for users and devices.
[Explore Cloud Auth](#)

A new era of secure data

HPE Aruba Networking teams with Pensando to deliver the next evolution of switching architecture with its CX10000 series top-of-rack switch, including 800G of distributed stateful firewall for east-west traffic, zero trust segmentation, and pervasive telemetry.

2021

The arrival of HPE Aruba Networking Central NetConductor

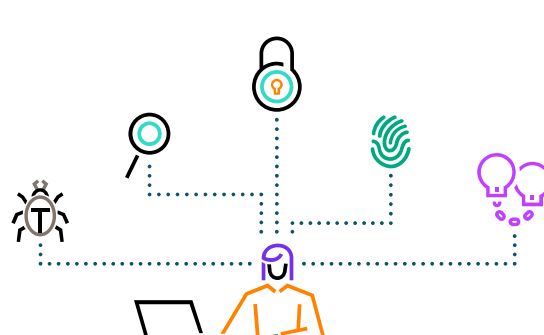

HPE Aruba Networking Central NetConductor extends Dynamic Segmentation across multiple network overlays, making it easier to adopt comprehensive zero trust and SASE security.
[Explore HPE Aruba Networking Central NetConductor Option 1](#)
[Option 2](#)

Unified SASE

HPE fortifies network security with the acquisition of Security Service Edge (SSE) provider Axis Security, strengthening HPE Aruba Networking's SASE solutions with an integrated, unified SSE and SD-WAN solution.
[Explore unified SSE](#)

2023

Cyber defenses strengthened through NDR

Expanded security solutions feature AI-powered behavioral analytics for threat detection and response and ability to enforce security policies in the cloud and the local area network via zero trust Network Access.

Unlock intelligent, secure, and AI-driven networking with Logicalis

Logicalis, a global leader in IT services, empowers businesses with AI-driven networking solutions through HPE Aruba Networking. Our expertise ensures seamless deployment, optimization, and ongoing management of intelligent network infrastructure, enabling organizations to enhance performance, security, and agility in an increasingly digital world. With Logicalis' Managed Services, businesses can simplify IT operations, reduce complexity, and free up internal teams to focus on strategic initiatives. Whether you're looking to strengthen security, optimize connectivity, or future-proof your network, Logicalis provides the expertise and support needed to maximize the value of HPE Aruba's AI-powered solutions. Contact us today to transform your network and accelerate innovation.

Take the next step toward AI-powered networking
