

**Solution Brief**

# Transforming Employee Experience

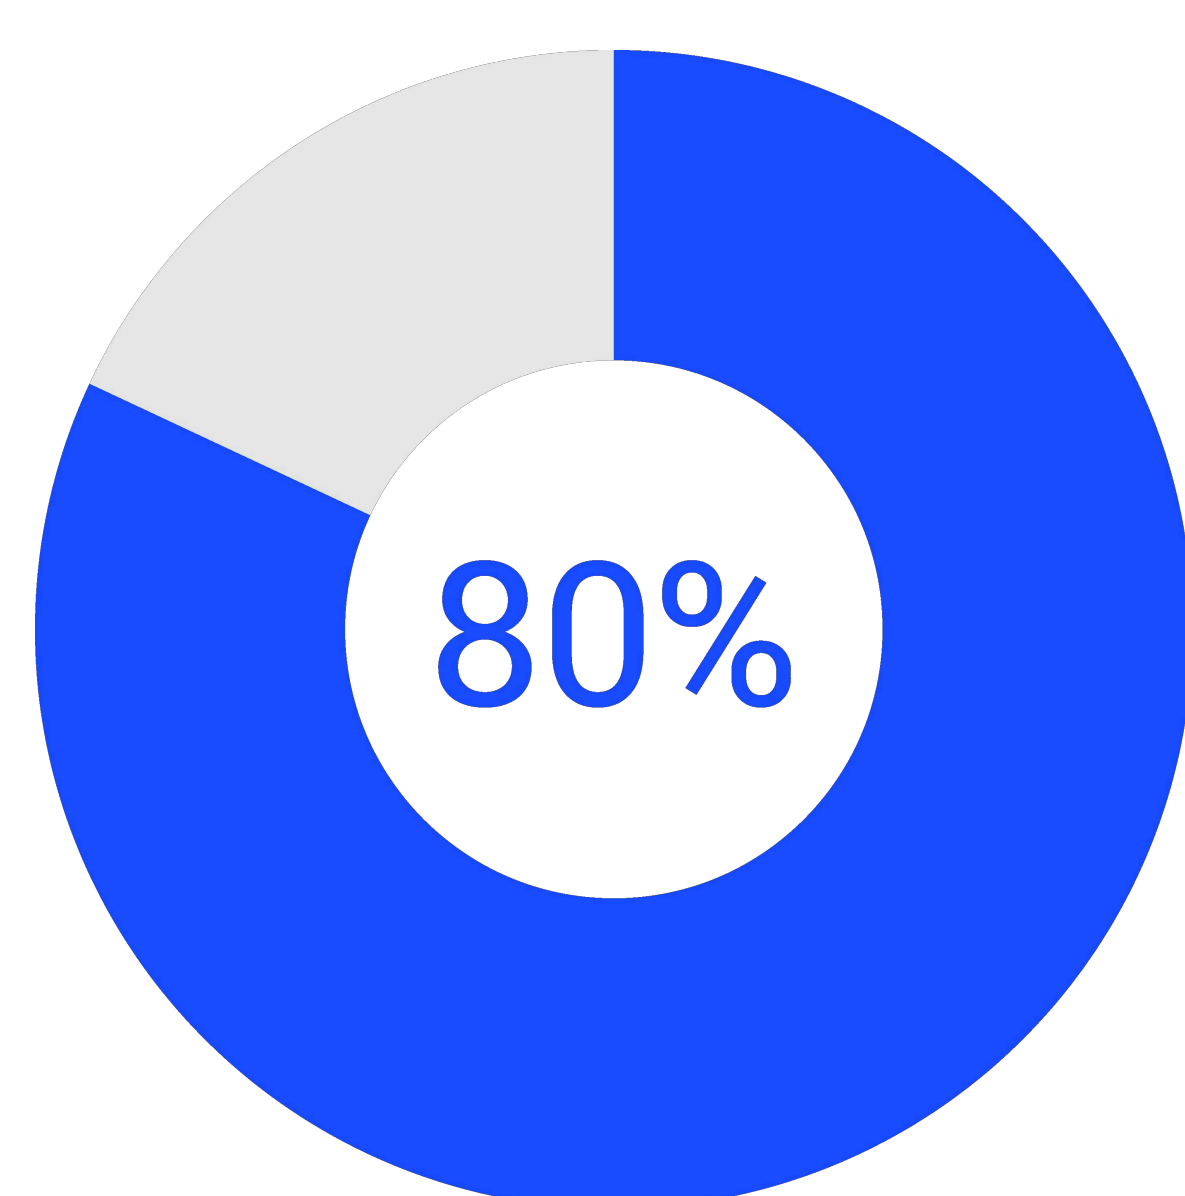

**Build a seamless digital workplace with the Microsoft Modern Work ecosystem**

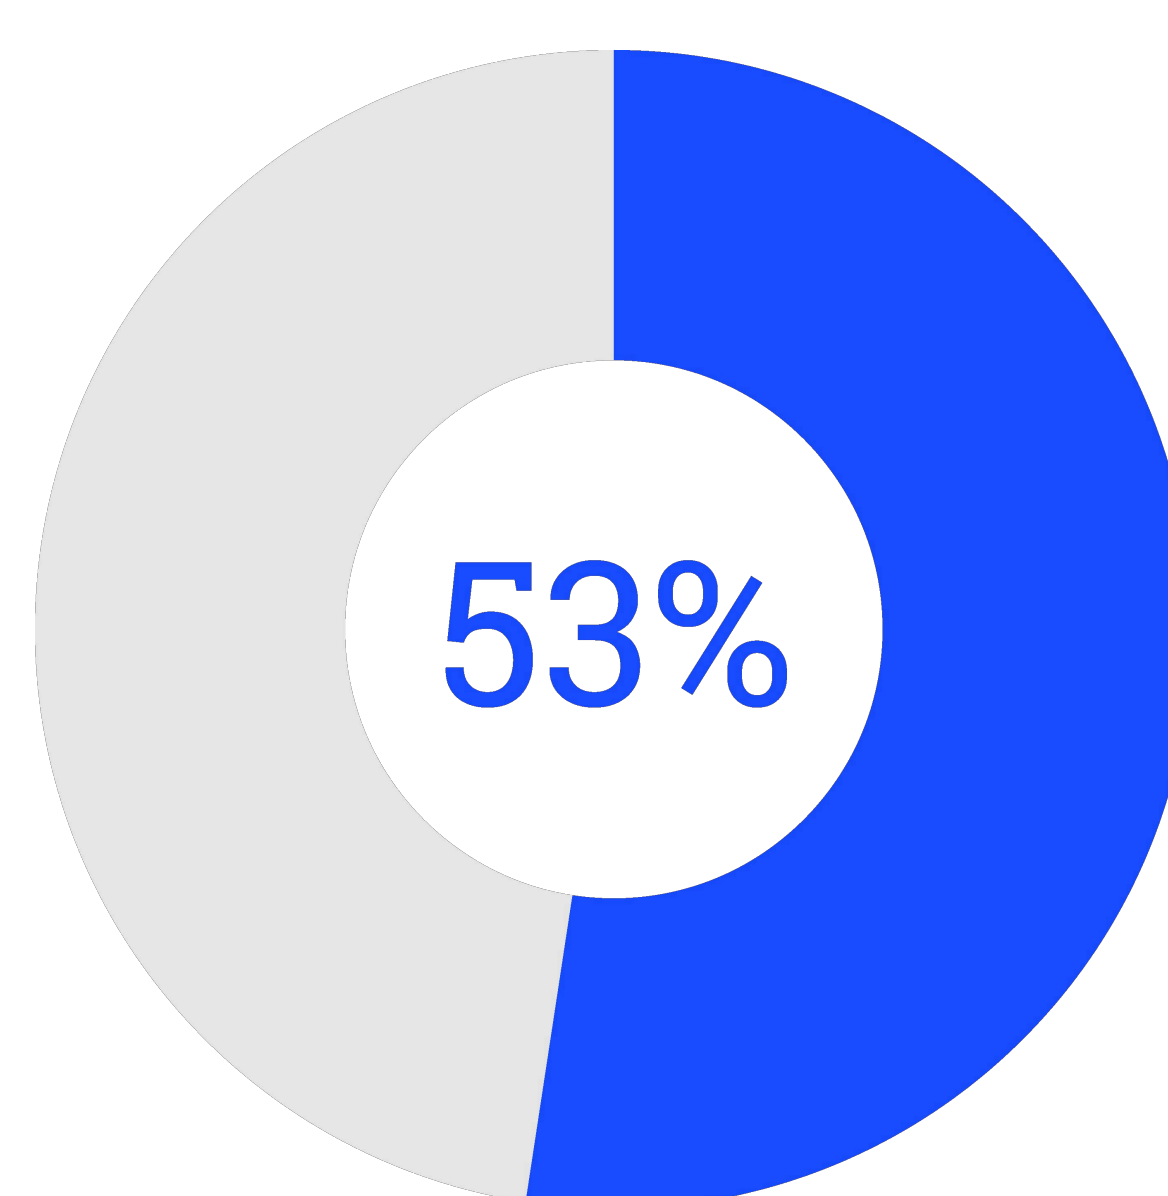

The digital workplace has evolved from a collection of productivity tools into the primary interface between employees and their organizations. With 72%<sup>1</sup> citing their digital workplace as extremely important to job satisfaction, creating a seamless, intelligent, and supportive digital experience has become more critical than ever.

Microsoft Modern Work represents a comprehensive ecosystem of interconnected solutions that can transform how employees collaborate and contribute. From Microsoft 365 and Teams to Viva and Copilot, Modern Work can help companies elevate productivity, engagement, and retention, while reducing IT complexity and costs.

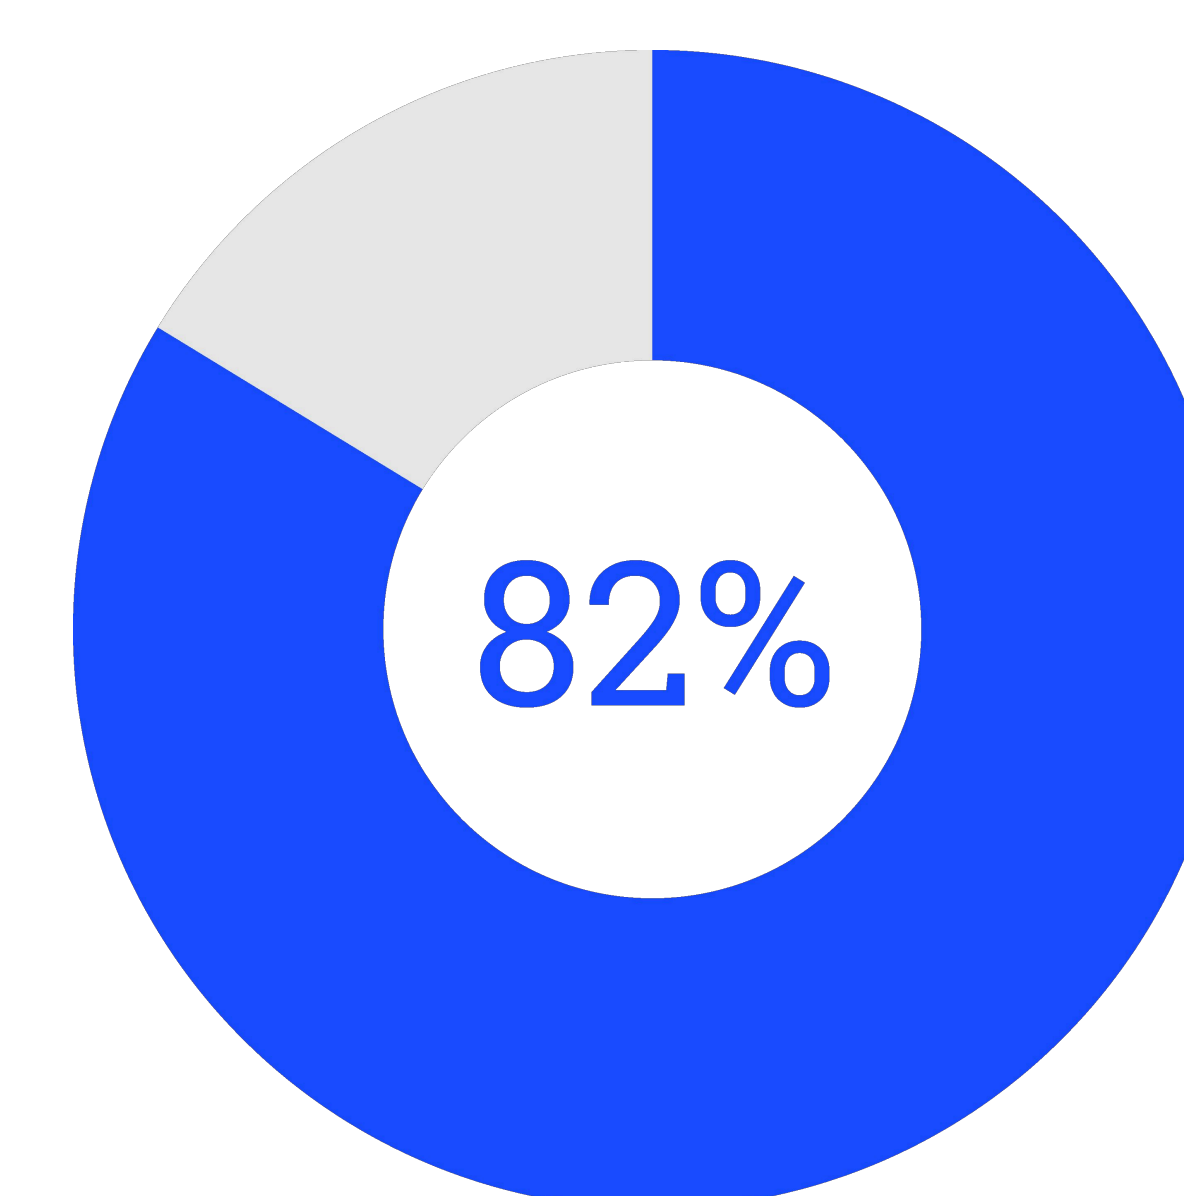

This guide explores how organizations can orchestrate Microsoft's Modern Work solutions to create digital experiences that employees genuinely value.

of the global workforce-employees and leaders- say they lack enough time or energy to do their work

of leaders say productivity needs to increase

of leaders expect to use ai agents, such as Copilot to meet the demand for more workforce capacity<sup>2</sup>

## An Integrated Ecosystem for an Integrated Workplace

Microsoft Modern Work includes a suite of solutions that work together to create an integrated experience across the digital workplace. From file management to office tools, low-code automation, security, and more, Modern Work provides one platform to unify the entire office.

- **Microsoft 365:** Elevate productivity with the complete office toolbox, including Word, Excel, PowerPoint, Outlook, OneDrive, and SharePoint
- **Microsoft Teams:** Keep employees connected through chat, video meetings, calling, and a host of third-party integrations
- **Microsoft Viva:** Enhance the workplace experience and keep employees engaged through insights, learnings, goals, and other engagement tools
- **Microsoft 365 Copilot:** Increase productivity by automating content generation, meeting summaries, data analysis, and more
- **Microsoft Graph:** Get more value from data with a unified intelligence layer that connects data and insights across all applications

- **Microsoft Entra:** Bolster security with identity and access management that includes single sign-on, MFA, and conditional access
- **Power Platform:** Automate tasks and democratize innovation with Power Apps, Power Automate, and Power BI
- **Windows 365:** Give employees a seamless remote experience through virtual desktops, app streaming, device flexibility

## How Modern Work "Works Together" to Create Seamless Digital Experiences

To build a modern, seamless digital workplace, it is imperative to fully adopt and integrate the ecosystem into the workplace. Here's how Modern Work "works together" to help organizations elevate the employee experience.

### The Productivity Foundation: Microsoft 365

Microsoft 365 and Teams create an integrated productivity foundation that unifies communication, collaboration, and content management across the entire organization.

- **Centralized collaboration** in Teams reduces context switching and eliminates the need to navigate between multiple applications for meetings, calling, chat, and file sharing
- **Real-time co-authoring** across Office apps reduces version control issues and accelerates project completion
- **Intelligent content management** with SharePoint helps employees find critical documents
- **Ensures universal file access** through OneDrive's seamless synchronization across all devices with enterprise-grade security and compliance

Fortunately, since most people are already familiar with Microsoft 365, adoption is usually straightforward. However, real transformation comes when integrating Microsoft 365 with the rest of the Modern Work suite.

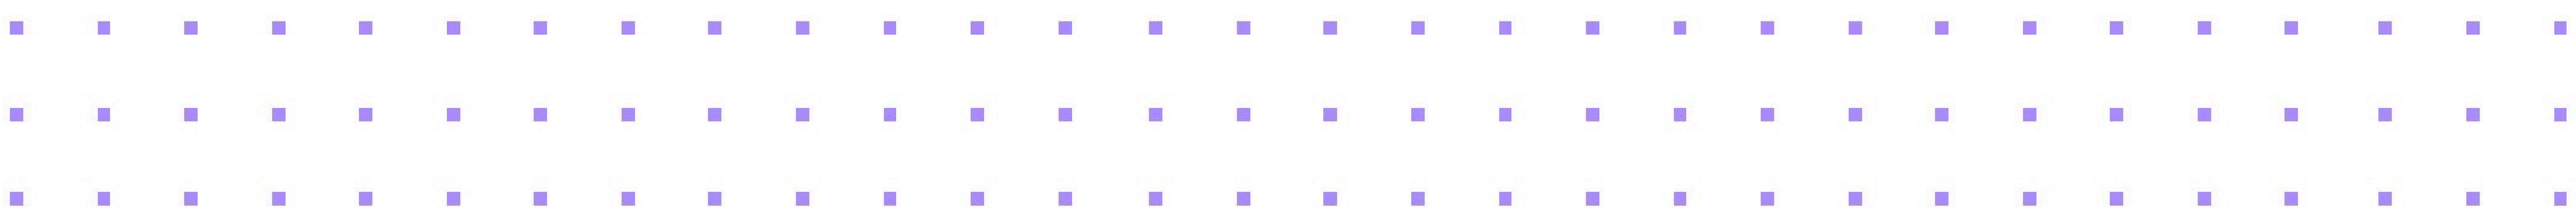

### Intelligent Automation with AI

Microsoft 365 Copilot transforms productivity by letting users perform tasks and interact with data using natural language.

- **Accelerates content creation** through AI-powered draft generation for documents, presentations, and emails
- **Streamlines data analysis** by automatically identifying patterns, creating visualizations, and generating insights from complex datasets
- **Reduces meeting overhead** with automatic transcription, summarization, and action item extraction from Teams meetings
- **Enhances decision-making** through instant synthesis of information from emails, documents, and chats

Integrated with the rest of the Modern Work suite, Copilot can add more context and more value and, most importantly, free up teams to spend more time on tasks that matter.

## Building Connection with Viva

Microsoft Viva integrates employee engagement, learning, and wellbeing directly into the flow of work.

- **Improves employee engagement** through dashboards that surface relevant news, resources, and community connections
- **Reduces burnout risk** with data-driven recommendations for focus time, break reminders, and work optimization
- **Accelerates skill development** via embedded training modules accessible directly within Teams and Office applications
- **Aligns organizational goals** through OKR tracking that connects individual contributions to company objectives

Many organizations understand the importance and business value of employee experience management. Viva provides a way to better understand, communicate with, and engage employees, so teams can work better together, longer.

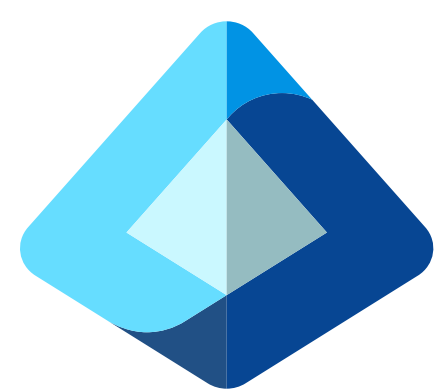

## Automation and Analytics with Power Platform

Power Platform and Power BI democratize application development, data analysis, and workflow automation, enabling business users to create custom automations and data apps without traditional coding expertise.

- **Reduces development time by** through drag-and-drop interface for building custom applications
- **Automate repetitive tasks** using pre-built connectors and templates for common business processes
- **Delivers real-time business intelligence** via dashboards that provide actionable insights
- **Deflects support tickets** through intelligent chatbots that handle routine inquiries and guide self-service

Power Platform opens the door to employee-led innovation, data science, and even app development, which in turn can deliver new forms of business value to the organization.

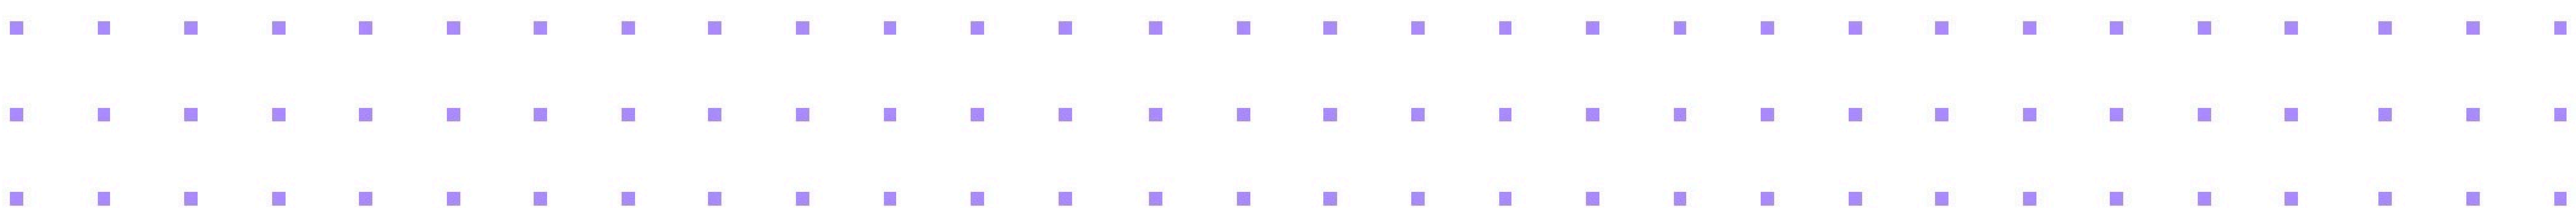

## Security with Entra and Purview

Microsoft Entra and Purview provide comprehensive identity management and data governance that help secure the hybrid digital workplace.

- **Reduces breach risk** through Entra's adaptive authentication and conditional access policies
- **Ensures compliance accuracy** with Purview's automated data classification, retention policies, and regulatory compliance monitoring
- **Prevents data loss incidents** via intelligent DLP policies that detect and block unauthorized sharing of sensitive information
- **Simplifies access management** through single sign-on and passwordless authentication

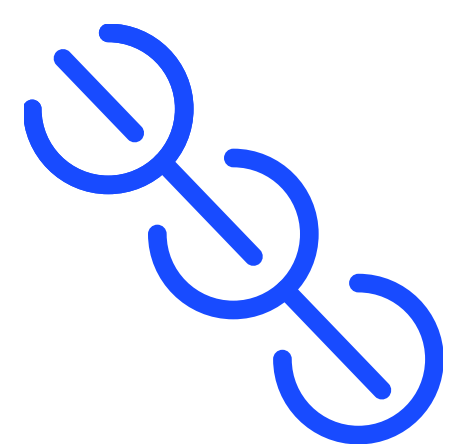

Microsoft Modern Work's inbuilt security solutions help ensure that the hybrid workplace run smoothly, while protecting data, maintaining compliance, and reducing risk.

## Are You Ready to Transform Your Workplace?

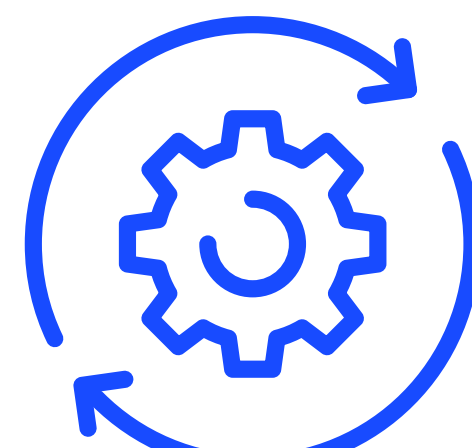

Creating a truly seamless digital employee experience is key to keeping employees engaged, productive, and satisfied. However, modernizing the workplace means more than just installing new software. To actually transform the workplace, it is essential to properly plan, adopt, and optimize your new technology stack.

Logicalis, a longtime Microsoft Partner, guides organizations through a three-stage process to ensure solutions are fully tailored, effectively implemented, and able to scale.

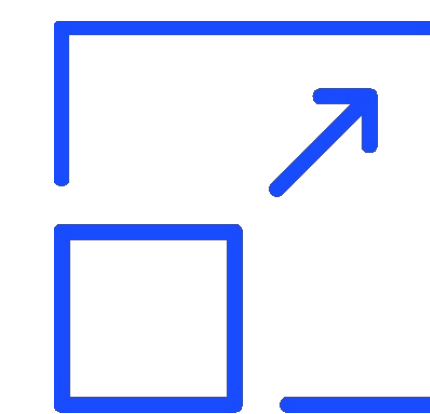

### 1. Align

We begin with an in-depth assessment to align technology solutions to your organization's core business goals, operations, and risk profile. Once we have a strategic blueprint that matches your needs, we'll build a plan that ensures your Modern Work investment directly supports your unique organizational needs.

### 2. Transform

Next, we design and implement the solutions needed to help your organization achieve its specific goals. Whether migrating to Microsoft 365, implementing Copilot, deploying Viva modules, or establishing security frameworks, we help with deployment, training, troubleshooting, and more.

### 3. Scale

Finally, we focus on establishing standardized processes and optimization over the long term. Our team is here to provide continuous support and management, so your Modern Work investment continues delivering value, while you can shift your focus to other business priorities.

### Next Steps

Are you ready to create a digital workplace that empowers your employees and drives business results?
